

FCC get your hands off my property! XM is a payed service! How dare you even consider the NAB's petition 04-160. If I wanted to pay another person to follow me around all day and give me weather updates, that's my business. Would the NAB have a problem with that too? Would the FCC have juristiction over that guy?

This is the same thing. If you don't pay XM, you can't hear XM. It's not a broadcast, it's a service... just like the guy following me with updates. Heck, if the FCC and NAB had a little backbone and stood up to recent cencorship trends, I might not have had to purchase XM to begin with. So NAB you can blame yourselves for losing listeners.

Just like everything is SUPPOSED to be in this country, the market makes it's own decisions. Radio does NOT give us what we want, XM does, so we buy it from them. Touch cookies NAB, that's how capitalism works!
